Subject: Microsoft Settlement

I agree with the breaking up of Microsoft. My company is losing sales daily because of their unfair practices. Our developers have even found evidence that MS is adjusting their products not to work with ours. Please stop this company or slow them down.

- By controlling the news content they can shape public opinion by presenting information on a favorable way to their interests.
- By controlling our identities on the Web (ie. Passport) they can track our lives in ways that no government can ever do
- By using sabotage tactics on their competitor's products they are eliminating the consumer's freedom of choice

Please help the American public, this company will become so powerful that no government will be able to contain it.

Faithfully yours,
Jorge Guerra
